

Anapea Village Saperavi

Amphora aged

Organic Farming

No Added Sulfur and Vegan

Anapea Village is a producer of traditionally styled Georgian wines. They farm organically without harmful chemicals, and make their wines naturally with no added sulfur. All of their wines ferment in clay amphora, qvevri, buried underground. This wine, from the Saperavi grape, is deep and dark after 6 months of macerations on skins. Rustic aromas of dark cherry, plum, and leather, compliment its medium bodied, concentrated, and juicy palate. Taste the world's original red wine from this historic vineyard!
